

DAX Formulas Used in Hospital Analytics Dashboard

Total Patients

```
Total Patients = COUNTROWS(Hospital_Data)
```

Total Revenue

```
Total Revenue = SUM(Hospital_Data[Total_Bill])
```

Average Satisfaction Score

```
Avg Satisfaction = AVERAGE(Hospital_Data[Satisfaction_Score])
```

Average Length of Stay

```
Avg Stay = AVERAGE(Hospital_Data[Length_of_Stay])
```

Insured Patients

```
Insured Patients =  
CALCULATE(  
    COUNTROWS(Hospital_Data),  
    Hospital_Data[Insurance] = "Yes"  
)
```

Non-Insured Patients

```
Non Insured Patients =  
CALCULATE(  
    COUNTROWS(Hospital_Data),  
    Hospital_Data[Insurance] = "No"  
)
```

Revenue per Patient

```
Revenue Per Patient =  
DIVIDE(  
    [Total Revenue],  
    [Total Patients]  
)
```

Maximum Bill Amount

```
Max Bill =  
MAX(Hospital_Data[Total_Bill])
```

Minimum Bill Amount

```
Min Bill =  
MIN(Hospital_Data[Total_Bill])
```

Average Bill Amount

```
Avg Bill =  
AVERAGE(Hospital_Data[Total_Bill])
```

Recovery Rate

```
Recovery Rate =  
DIVIDE(  
    CALCULATE(  
        COUNTROWS(Hospital_Data),  
        Hospital_Data[Outcome] = "Recovered"  
    ),  
    [Total Patients]  
) * 100
```

Critical Patient Rate

```
Critical Rate =  
DIVIDE(  

```

```
CALCULATE(  
    COUNTROWS(Hospital_Data),  
    Hospital_Data[Outcome] = "Critical"  
),  
[Total Patients]  
) * 100
```

Month Column

```
Month =  
FORMAT(Hospital_Data[Admission_Date], "MMM")
```

Month Number Column

```
Month Number =  
MONTH(Hospital_Data[Admission_Date])
```
